In response to applicant's filing dated October 02, 2003, the following action is taken:

Claims 1-7, 11 and 12 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Pannu v. Storz Instruments Inc.*, 258 F.3d 1366, 59 USPQ2d 1597 (Fed. Cir. 2001); *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to claim subject matter that applicant previously surrendered during the prosecution of the application.

Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope of claim subject matter surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

The limitation correction to claim 1 appears to be impermissible recapture. During the prosecution of the patent, a preliminary amendment was filed canceling original claims 1-19. The examiner then made a restriction on original claims 20-33, asserting 33 patentably distinct species. Applicant replied to the election requirement by arguing 5 patentably distinct species and electing species 5 and canceling all of the rest of the original claims 20-33 and adding new claims 34-48, which he stated read on

species 5. The prosecution history shows that the limitation which is now being added to patent claim 1 was originally presented at the time of filing (see original claim 27, for example) and claims with these limitations were canceled in response to the restriction requirement.

Claims 1-44 are rejected under 35 U.S.C. 251 as being broadened in a reissue. The reissue oath/declaration filed with this application is defective because the error which is relied upon to support the reissue application is not an error upon which a reissue can be based. See 37 CFR 1.175(a)(1) and MPEP § 1414.

Application filed outside the two year statutory period. In accordance with MPEP 1412.01, applicant's failure to timely file a DIV application prior to issuance of the patent cannot be recovered by filing a reissue application. It appears that is what applicant is trying to do. The limitation being corrected in reissue claim 1 was surrendered during the prosecution of the patent; and therefore the claims of the reissue are also rejected under 35 USC 251 for lack of defect in the original patent, as discussed in this section of the MPEP.

A claim is broader in scope than the original claims if it contains within its scope any conceivable product or process which would not have infringed the original patent. A claim is broadened if it is broader in any one respect even though it may be narrower in other respects.
